## USGBC ~ GALVESTON BRANCH

5:45pm Wednesday, Oct. 7<sup>th</sup>

GHF Architectural Salvage Warehouse 908 23rd Street.

### LEED 2009

Please join the Galveston US Green Building Council (USGBC) for a presentation on Leadership in Energy and Environmental Design (LEED) and important changes to the certification program.

Amanda Tullos of Green Building Services, Inc. will present a comprehensive overview and analysis of the changes to the USGBC's LEED Rating System. The program will start with an overview of the USGBC and the LEED rating system, followed by an outline of the fundamental structural changes to the core LEED products. This program will help you improve your understanding LEED and what has changed and what impact these changes will have on your future projects.

By the end of this one hour session you will be able to communicate effectively with team members and clients about LEED and what the changes really mean.

This presentation will offer valuable insight from the insider's perspective, as well as, practical information to facilitate and implement the new LEED 2009 requirements.

**1 CEU will be offered in the Health Safety Welfare category and toward LEED credentialing requirements.**

This program is FREE and open to the public.
